Paediatric Orthopaedic Society of India

The Organizing Team Message

It is after a gap of 15 years that Christian Medical College once again has the privilege of hosting the Annual meeting of Paediatric Orthopaedic Society of India, its 24th. This is combined with the 7th Joint POSI POSNA workshop. The primary aim of this conference and workshops is to discuss new knowledge and key strategies in managing children's orthopaedics. For the dedicated Paediatric Orthopaedic Surgeons it covers newer diagnosis, management and research, for established orthopaedic surgeons it provides, in addition, a recap of current management practices and for the trainees there is a rare opportunity to hone their diagnostic and surgical skills in the workshops. As the focus of the meeting is on research and training this is a good opportunity for teachers and researchers in the field to come and share their experiences.

The host of imminent national and international faculty will ensure a robust scientific program. This is a wonderful opportunity for all who are passionate about learning and sharing to be in Vellore. We welcome you here and look forward to your participation in the meeting.
